OUR FREE OFFER

As an international professional, you will receive an individual consultation and interview for successful further possible steps into the regional labor market.

As a company, you will gain initial insights into how you can not only recruit, but also onboard and retain international professionals. In addition, we show you a more direct access to candidates.

We can support all professionals who have first, expandable English - and / or German skills.

We would like to take every opportunity to get to know you. Prerequisite is that you bring a written history/CV and - best of all - email it in advance. This way we can contact you directly beforehand to prepare the dates. However, coming spontaneously is also possible.

All other interested institutions and participants of the Bergische Expo are also welcome to visit us!

Together we are stark.
